

INDUSTRY

CHEMICALS AND PETROCHEMICALS

WHICH YOU CAN RELY ON

From planning to maintenance

Where pipeline and plant construction for the chemical and petrochemical industries are concerned, KNAACK & JAHN covers the following core sectors by means of its own, specially trained staff:

- Consultation, planning and engineering in line with official requirements
- New plant and plant conversions
- Plant maintenance
- Standstills

For this we can ensure effective, on time and trouble-free handling taking into account safety at work (SCC certified, safety audits) as well as the statutory requirements (German Water Resources Act, Product Safety Act, etc.)

All pipeline and plant construction, steel construction as well as instrumentation and control technology tasks can be solved by our own staff. Our chartered engineers from the machine building and plant operating sectors, our technicians, master craftsmen and resident engineers from the industry, as well as our fitters, welders, metal-workers and electricians are known for their outstanding professionalism and reliability.

In addition, KNAACK & JAHN can handle everything from the planning stage right up to turnkey handover. Commissioning, official acceptances as well as training of your staff can also be handled by us.

SAID. DONE!

REFINERIES AND TANKFARMS

Services

- Construction of product pipes (danger classes AI to AIII and according to the German Water Resources Act)
- Construction of supply lines, e.g. compressed air, water, fire mains, N₂, etc.
- New build of pipelines and connecting lines as well as of pigging systems
- New build and conversion of jetties for barges and ocean-going vessels
- New build and conversion of tank areas, pump stations and distributors
- Retrofitting tanks with double bottoms and an inspection space, reinforcing tanks in way of additional pipe connections, level measurements, repeat tests, etc.
- Building tanks, heat exchangers, double-walled pipelines with inspection space
- Steel construction
Pipe bridges, platforms, general steel construction
- Accompanying official acceptances of complete small tankfarms up to individual acceptances of plant components

Materials and systems

- General purpose constructional steels, St 35.8.1, 15 Mo 3, 13 CrMo 44
- Austenitic high-grade steels, titanium and aluminium
- Copper and other materials
