**PREMIUM FIRE PROTECTION  
SAFETY ON LUXURY YACHTS**

**KJ FIREOFF® THE HIGHLY EFFECTIVE WATER MIST SYSTEM**

### **Maximum patented performance and maximum scope for design**

Luxury yacht owners have highest requirements on interior design and equipment. KJ FireOff Water Mist System has an excellent performance in the field of fire protection as well as optical appearance. Every field of application has different requirements to the system. Open nozzles or our automatic nozzles with glass bulb. Accommodation and public spaces will be equipped with our patented automatic nozzles as a part of a “wet” system.

The KJ FireOff OHM nozzle with “super fast response” glass bulb will detect a fire and release to suppress the fire immediately.

KJ FireOff automatic nozzles also fulfill highest requirements in terms of esthetical performance and patented technique. Rosette and cover-plate are available in chrome as well as in all RAL colors and for discerning end-customers in a gold plated version in all viewable parts.

Special customer requirements. They are all a welcome challenge.

Concealed installation, in ceiling systems or in a horizontal sidewall version, so we offer a maximum scope for design.

The KJ FireOff Water Mist System and all its components are approved by all major classification authorities.
